2. Technical Discussion

Because everyone on the team plays cricket, the team decided to establish a cricket website. We spoke about a color theme and an approach throughout the development process since we wanted the website to be user pleasant and entertaining. We decided on a single theme and built the navigation bar and footer, which must appear on all pages.

Inside a division tag <div>, I created guidelines for the quiz questions. And I used CSS to create a start button for going to the quiz questions.

```
<!--Multiple-choice quiz-->
<div id="home-area" class='start-question-box'>
  <h3>Welcome to the Quiz</h3><!--guidelines of the quiz -->
  <br>
  <p>Total number of questions:<span class='total-questions'>10</span></p>
  <p>You have only 60 sec to think.</p>
  <p>The time will start after you press the start button</p>
  <p>Good Luck</p>
  <button type='button' class='btn' onclick="showQuestions()">Start</button>
</div>
```

```
.btn{
  padding: 16px 47px;
  background-color: #051367;
  color: #ffffff;
  border: none;
  font-size: 16px;
  border-radius: 10px;
}
```

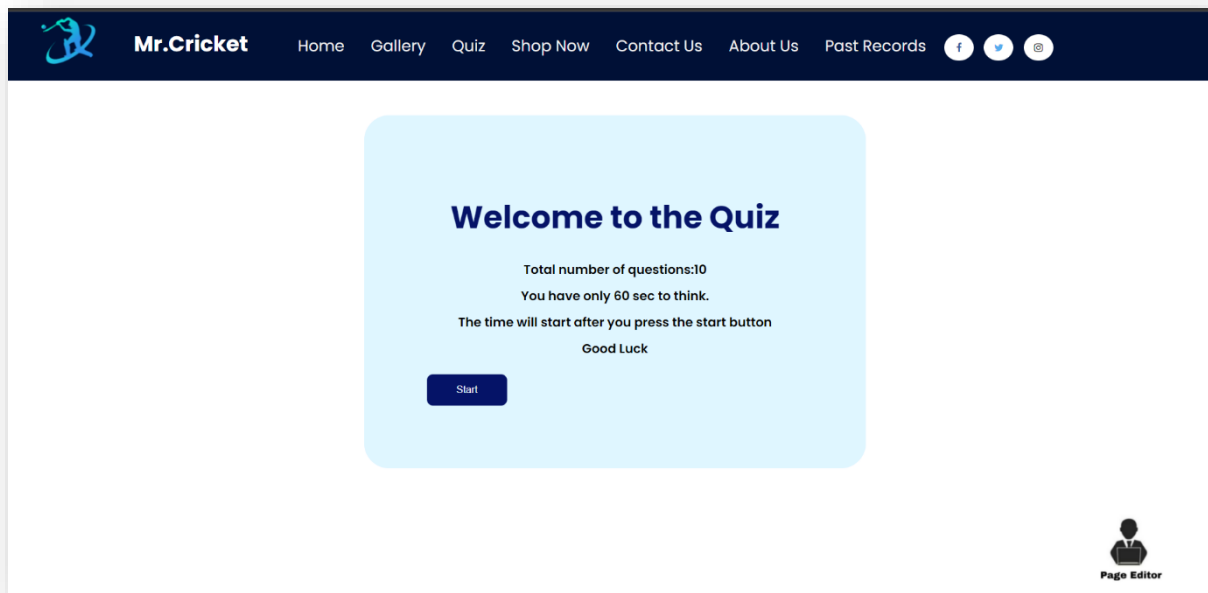

Figure 4 Quiz start

The user can then go to the quiz questions by hitting the "START" button.

There are ten quiz questions. I was answering the quiz with the radio buttons. I was given one minute to complete the task.

```

After one minute, it turns off and displays the user's result. The results display the user's total score, questions for which the user-submitted correct answers, and questions for which the user entered erroneous responses.

The user will get 2 marks for each correct answer, and -1 for each wrong answer.

```
function showResults () {
  var homeBox = document.getElementById("home-area").hidden = true;
  var questionBox = document.getElementById("questions-area").hidden = true;
  var resultsBox = document.getElementById("results-area").hidden = false;

  var selectedAnswers = [];
  for(let j = 0; j < 10; j++) {

Challenges faced during development:

The most difficult part for me was planning the logic for the JavaScript used to create the quiz. The other was arranging the images of all four students in a row. As a result, I watched several YouTube videos and listened to lecture notes. Then, once I completed the tasks effectively, I became mired in difficulties.

I make certain that all three web pages I develop function properly. The appropriate screenshot will be included in Appendix C.

4. Janet

JANET is highspeed computer network that links education and research community in UK. This enables institute to improve the student experience with rich learning research and helps the students to stay on the right track In the JANET network there are some policies to follow as an organization or institute that uses its network

those are 1. Eligibility Policy
2. Acceptable Use Policy
3. Security Policy these policies make sure that all the organization and institute keeping their network secure

I oversaw ensuring that the quiz and student information adhered to Janet Policies and Legal Requirements. Our website name " Mr. Cricket" is a unique name that is not being used by anybody else, thus no copy right issues will arise. Our website's logo is one-of-a-kind, and it, along with the website name, is not found anywhere else on the internet, thus any developments are subject to Janet Regulations.

The quiz contains certain questions that were obtained from non-copyright cricket question sites, thus it's completely legal and there's no problem with utilizing questions and answers from non-copyright sites. I utilized Google Fonts on both of my pages, and I've listed it as a reference that I've used. So, by utilizing Google Fonts and open-source icons, I have not committed any unlawful acts. I didn't use any material from the internet to create my web pages; all the descriptions are my own creations.
